

Construction Services

Dearborn Mid-West Conveyor Co.

Our Mission is to Provide Our Customers with People, Business Practices, and Construction Services of the Highest Integrity.

DMW has partnered with a large number of diverse customers for construction services in North America. We offer cost effective solutions to every project scope. Through the direction of our Construction Management Team, we are confident that DMW will exceed your installation expectations. Our capabilities are demonstrated time and again through repeat business clients.

DMW's Construction Services begins with the initial planning phase and extends through project startup and system support. While working with DMW, you will receive unparalleled leadership and service, attention to detail, focus on safety and a final product characterized by its integrity.

The Integrity of our Construction Services starts with our people...

Our Work is Rewarded

Worker Safety Awards

- National Maintenance Agreement Policy Committee

Construction Services

Equipment Installation & Machine Tooling

Our capabilities include installation of conveyors, production machinery and equipment within diverse industries. We utilize innovative technology to ensure your system is installed to maximize performance and withstand the conditions in which it resides.

Maintenance Services

DMW offers customized maintenance services to any size and type of existing or new equipment. We can tailor a program of maintenance activities in accordance to manufacturer specifications, customer demands, and system dynamics.

Construction Management

Our full-service project management begins with our experienced installation team working to exceed all expectations. We take pride in managing projects from customer orientation, through installation, and ending with maintenance.

Commercial & Industrial

Our full-service construction management begins with our experienced team working in conjunction with the architect and engineers to exceed your expectations. We take pride in managing projects from pre-construction planning, through installation, and ending when the warranty period is completed to ensure total customer satisfaction.
